Art Unit: 1712

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with James E. Armstrong, IV on April 12, 2006.

Claim 1, line 4 and 5, after "nucleus" insert --derived from a polyhydric phenol-- and line 5, after "nucleus" insert --derived from a polyvalent carboxylic acid--.

The following is an examiner's statement of reasons for allowance:

The more concise denotation of the aromatic hydrocarbon groups (a1) and (a2) of the aromatic polyester as derived from a polyhydric phenol and a polyvalent carboxylic acid as supported by page 15, lines 15-22 of the specification is not recited in the closest prior art to Japanese Patent No. 2002-12650. The Japanese patent discloses and shows an aromatic polyester derived from either a phenol, cresol, xlenol or naphthol; or a dihydroxy biphenyl or tetrahydroxy benzophenone (pages 6-7, paragraph 64). There is no motivation to employ claimed mixture of a polyphenol and monohydric phenol which forms the terminal aryloxycarbonyl group (c) in the formation of the aromatic polyester of the Japanese patent.

Art Unit: 1712

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled
